of Articles Exported from Foreign Countries.

WASHINGTON, Sept 7 The enormous falling off in United States Customs receipte during the pendency of the tariff bill, gave some idea of the great decreases in the amounts of values of articles exported froin foreign constries to the United States during that period, but customs officials and others having the deal with the assessment of duties, were hardly prepared for the showing contained in the reports received and just compiled at the State department. Communications received from consular officers giving consolidated statements of the exports of various countries to the United States, show that during the quarter ending June 30, 1894, the exports of every country decreased to an extraordinary degree as compared with the exports during the corresponding period in 1893.

Japanese Take Possession of an Outrageous Fake Circulated by One County in Minnesota Fur-Island in Society Bay.

The Anti-English Sentiment in Japan Growing Stronger.

CHINESE SURPRISED.

SHANGHAI, Sept. 7. An armistice between Chins and Japan is imminent.

The Japanese have occupied some islands in Society Bay to the north of Port Arthur, the intention being to use this island as a base of operations.

The Chinese were talken completely by surprise and consequently were able to offer no opposition to the occupation of the island. Everything connected with the affair indicates the purpose of the Japanese to stand a seige, if necessary, until the force occupying the island shall have been reinforced sufficiently to justify an attack upon Port Arthur.

here Wednesday, brings late news of the Chinese-Japanese war.

In China the sinking of the Kow Shing has been made the very most of, seemingly with the object of bringing Great Britain into the quarrel, wherever the British war ships have struck terror to at least a portion of the inhabitants, who imagine their mission to be one of vengennes. The anti-English sentiment in Japan is being fostered by the government and it duly grows stronger, as may be gathered from the offensive articles in the duly papers and the contemptions.

ment and it daily glows stronger, as may be gathered from the offensive articles in the daily papers and the contemptuous tone of the English press. The reported bombardment of Wei-Hi-Wei by the Japanese fleet of 21 ships early in August appears to have been for the purpose of estimating the ranges. According to the officers of H. M. S. Mercury, who witnessed the bombardment from the decks of the coasting stemer Taku, the fleet consisted of 21 vessels exclusive of torpedo bosts and was split up into two divisions. The Japanese approached a fortress from the south and manouevred ships about as the short sell short or wide so as to ascertain with the most deliberate accuracy the exact range of the guns on whore. A couple of dozen shots were discharged by the Japanese to keep up the play, after which two of the divisions stemed off towards Port Arthur.

DISREGARD FACTS.

Regarding a Disaster in the Mining Town of Scotch Valley.

Philadelphia, Pa. Sept. 7. Great Indignation is manifested here on account of an ourrigeous canard which was circulated yesterday to the effect that the mining town of Scotch Valley, near Hazleton, had been desfroyed by a caven which enguired the entire village. The story was circulated by the Chicago organization styling uself the Associated Press, and the alarming news caused a sensation in unling circles, as well as among the general public, until a positive denial of the fake was published by the United Press. The wealth of detail with which the Associated Press story was clauorated led at last to a general impression that the story must be correct. pression that the story must be correct despite the fact that the public has by this time grown accustomed to see "Associated Press" sensations turn out to be nuffounded.

this time grown accustomed to see "Associated Press," sensations turn out to be unfounded.

As an example of 'unblashing and heartless disregard of facts, this emanation from the western concurn is the most conspicuous that has yet been foisted upon the newspapers which rely upon that organization for the news with which they regale their readers. The story was entirely without truth. There was no cave in, nor any accident of any kind. After publishing the alarming parrathy in two editions of the papers, the western organization was forced to deny its own news later in the day by a positive withdrawal of the whole story. The episode farmishes one of the best examples of the unreliability of the western Associated Press much that has yet come to the attention of the reading public. A feebler effort of the same kind, however, was made by the same concern on Sept. 5th, when a despatch to the following effect appeared in the newspapers served by that organization.

"It is reported here that English Conter, a small hambet in Lyvoning County, of 200 lahabitante, has been destroyed by forest fires."

The Populists at Washington are claiming that great results will follow in the Western States from Senator Jones' defection from the Republican party. They assert that Idaho will go for the Populists. Senator Dubois denies this, and declares neither himself nor the other Western Schator will follow Mr. Jones' example. Other States which will elect Senators this fall, which, it is claimed, will be more or less affected by the action of Senator Jones, are Colorado, Mintson and Wyoming. Within a rappe of possibilities all those States may have legislatures controlled by Populists and these imay elect. Populist Senators. VICTORIA, B. C., Sept. 7. The steamship Empress of China which arrived here Wednesday, brings late news of the Chinese-Japanese war. In China the sinking of the Kow Shing has been made the very most of, seem ingly with the object of bringing Great Britain into the quarrel, wherever the British war ships have struck terror to at least a portion of the inhabitants, who imagine their mission to be one of vengence. The anti-English sentiment in Japan is being fostered by the government and it daily grows stronger, as may be gathered from the offensive articles in the daily papers and the contemptions tone of the English press. The reported hombardment of Wei-Hi-Wei by the Japanese fleet of 21 ships early in August appears to have been for the purpose of estimating the ranges. According to the officers of H. M. S. Mercury, who witnessed the bombardment from the decks of the coasting stemmer laku, the fleet consisted of 21 vessels exclusive of torpedo boats and was split up into two divisions. The Japanese approached a fortress from the south and manoneverd ships about as the short fell short or wide so as to ascenting with the most deliberate accuracy the exact maps of theiguns on shore. At 8 15 this morning the first train bound north moved past the scene the laward track was not cleared till noon. Opinion on Coming Events
IONDON, Sept 7 The Times says, editorially, to-day It is improbable that the American tariff will be sitered before the winter of 1897 and 1898. Attempts will be made to modify it by piccement, but nothing will be done by the present Congress. The Republicans are likely to get a majority in the house in the November elections, but they will be unable to command enough rotes in the Sente to overrule the President's veto Therefore is the next Congress the tariff will be in a dead-lock over which business men, whother protectionists or tariff reformers, may lationally ripuee. The whole wild is interested in the revival of business in the bates, and the settlement of the tariff for three years is one of the conditions making for a long delayed recovery, but a complete change in the methods of American railway management is equally necessary to this improvement. Telegraphic Notes Bishop of Urgel, who comointly with France is Curerain of the neutral country of Andoora, has issued a pastoral letter claiming that he is sole ruler of Andoora and declaring he will no longer acknowledge the sovereignty of France. This action has caused great excitement in the so-called Andoora Republic.

A meeting, at Dover, N. H., of a delegation of Free Baptist ministers, to see a bout the purchase of a home for aged and indigent Free Baptist ministers of New England, was hold. The committee consisted of Rev. R. I. Howard, of Maine, Rev. C. L. Pinkham, of New Hampshire, Rev. E. G. Wesley, of Rhode Island, Rev. W. T. Twort, of Massachusetts, and Rev. R. W. Churchill, of Vermont, They obtained a refusal of the Isaac F. Abbott house, Arch street, until they can report to the several conventions. The committee feel sure this place will be purchased for the purpose. A Shanghai despatoh says: Japanese regulars in Corea number 30,000. Some 10,000 there, comprising a strong cavalry force, were detailed for soenting service and protection of the main army's lines of supply and communication. Some 10,000 Japanese eccupy a strong protection at Ping Yang. They have thrown up cutth works and mounted heavy gans. The Chinese army with about 20,000 guns have taken a position facing the Japanese. Soouting parties from the two camps met frequently and exchanged shots. The mortality is considerable and the spirit of the Japanese troops is said, to be all that could be desired. The Populista at Washington

The Populists at Washington are cluming that great results will follow in the Western States from Senator Jones' defection from the Republican party. They assert that Idaho will go for the Populists. Sciantor Dubois denies this, and declarts neither himself nor the other Western Senator will follow Mr. Jines' example. Other States which will elect Sciantors this fall, which, it is olaimed, will be more or less afforced by the action of Senator Jones, are Colorado, Montana and Wyoming. Within a range of possibilities all these States may have legislatures controlled by Populists, and these may feed Populist Senators. The Populists say that with the election of Tillman from Bouth Capoling, and each accessions to the ranks as peem, now absolutely certain, they will hold the buly sace of power in the Senate, in the Juture. The hor mering is a somewhat danger went on in the hands of an expert but when a novice undertakes to foo with the stick he is upt to be the greatest officret Mr Thomas White can tell you just how it feels to come in contacwith a full grown boomerang. He and his friends tried their hands at booling-arg throwing Friday and are now binding up their wounds. They thought they had the thing almed all; right but as a result all of them in general and Mr Whi e in particular is extremely sore

It will be remembered that when the Democratic county convention assembled n this city it nominated Mr James Mulvaneyjas a candidate for State Senator from Bangor | The ununlmity with which the nomination was made was only exceeded by the unanimity with which the nominee declined to permit the use of his name Mr Mulvaney is a man of sense and had no idea of offering himself for the sacrifice. The vacancy had to be filled and the party workers made a demand upon Mr. White That gentleman was bardly a free agent as he has a welldeveloped ambition to occupy the chair of the Collector of the Port. The fellows who had the ring in his nose realized their advantage and would not take no for an answer, the result being that the name of White was substituted for Mul-

vancy on the ticket. Having been forced to accept the nomination the next thing in order was to do something to make a showing of strongth at Washington. The matter has been the subject of many secret conclaves and as a result the insurance case was hit upon as a means of working up a feeling against one of the Directors of the Malue and New Brunswick Company, William Engel, Esq. who is the candidate on the Republican tract, for State Senator. As a part of the programme it was proposed to hold great meeting of policy holders to work up a resolution of centure to be sprang upon the people on the very eve

polit, there being just fourteen men present. The cat under the meal was promptly disclosed when the meeting assembled and Mr White calmly proceeded to call oorder. This was where he made t ilstake. Once in the chair he was

forced to remain there and what a comb-

N:w Orlians, Sept 7 Advices from
Bluefields my that Minister Mauriz has
pussed a decree setting shide the order
for martial law in the cities and villages
of the Arlangh. Coast to take effect on
the day of the installation of the munitipul governments and ordering that or
sept 18, elections shall be held in Bluefields, Pearl Lagoon and Corn Island for
the formation of the respective munitipainties Bluefields will be made the
port of entry of the territory. Under
the new arrangement unless a nann is a
property holder or has five hundred
silver dollars lie will not be allowed to NOTHING STRANGI Intelligent people, who realize the important part the blood holds in keeping the body in a normalicondition, find northing strange in the number of diseases Hood's sarsuparitia is able to cure. So many troubles result from impure blood, the best way to treat them is through the blood Hood's Sarshparilla vitalizes the blood Hood's Pills are the best after-dinner

PECULIAR TO ITSELI
Hood's Sarshpartila is peculiar to itself, in a strictly medicinal sense, in three important particulars, viz lirst, in the combination of remedial agents used, second, in the proportion in which they are mixed, third, in the process by which the active curative properties of the preparation are secured. These three important points make Hood's Sarsaphillin peculiar in its medicinal merit, as it accomplishes cures hitherto unknown. But it is not what we say but what Hood's Sarsapartila does, that tells the story! What Hood's Sarsapartila has done for others is reason for confidence LONDON, Sept. 7. Channesy an Deptew was seen at Hotel Suvoy this afternoon by a press representative who asked him whether he would accept the Republican nomination for governor of New York. Mr. Dopew sald "I am not a candidate for the nomination. Before I leff New York leading men of different factions of the Republican partry called upon me and said if I would secept no other name would be put in nomination. I positively declined. atory! What Hood's Sarsaparina done for others is reason for confide that it is the medicine for you

"All run down" from weakening effect of warm weather, you need a good tonle and blood purifier like Hood's Saranparilla. Try it.

"Much in little? this sentence means.

It has himsel bocome a proverb, because it the expression can be used in so many instances. In no instance, however, chi this saying he used with greater, proprise ty than in speaking of Dr. Pierce's Pieas and Pellets. There is ladeed much light this value of them—there is a fure for many's headache—tellet from drype-galle, billiousness, constituation, colle, and piles and restoration to health and happiness. Plating Aluminium.

The new German method of conting aluminium with other metals is regarded as of decided mechanical industrial value. The process consists simply in dipping the aluminium in a solution of enusite potant or soda or of bydrochoric soid until hubbles of gas make their appearance on its surface, at which stage is it dipped into a solution of corrosive sublimate to amalgament its unface. After a second dipping into causilip notats until its bubles of gas are evolved the metal is placed in a solution of satiof the desired metal. CHAPTER XIX And the marrow has come. Down in a deep and bluff shadowed valley, hung all around with picturesque orage and pine erested heights, under a cloudless September sun, whose warmth is tempered by the mountain breeze, a thousand rough looking, bronzed and hearded and powder blackened men are resting after battle.

which greets their nostrils. Down stream, where the fires are burning, are the blackened remnants of a wagon train. Tires, boths and axles are lying about, but all woodwork is in smolder-ing ashes; so, too, is all that remains of several hundredweight of stores and supplies destined originally to nourish the Indiaus, but, by them, diverted to the Indians, but, by them, diverted to feed the fire.

There is a big circle of seething flame and rolling smoke here, too—a malodorous neighborhood, around which maiodorous neighborhood, around which fatigue parties are working with avert-ed heads, and among them some surly and unwilling Indians, driven to labor at the muzzle of threatening revolver or carbine, aid in dragging to the filtness carcass after carcass of horse and mule,

blood stained, all of no more use to mortal wearer.
Out on the southern slopes, just where a rawine crowded with wild rose bushes opens into the valley, more than half the command is gathered, formed in rectangular lines about a number of shallow, clongated pits, in each of which there lies the stiffening form of accuracy who but vectoriary joined in a comrade who but yesterday joined in the battle cheer that burst upon the valley with the setting sun. Silent and reverent they stand in their rough campaign garb. The escort of infantry "rests on arms;" the others bow their uncovered heads, and it is the voice of the veteran colonel that, in accents trembling with sympathy and emotion, renders the last tribute to fallen comrades and lifts to heaven the prayers for the dead. Then see! The mourning groups break away from the southern side, the brown rifles of the escort are lifted in air, the listening rocks resound to the sudden ring of the flashing vol-ley, the soft, low, wailing goodby of the trumpets goes floating up the vale. and soon the burial parties are left alonto cover the once familiar faces with the earth to which the soldier must re-

And when the old regiment begins its homeward journey, leaving the well won field to the fast arriving commands and bidding hearty soldier favowell to the cavalry comrades whose friendship they gained in the front of a savage for. they gamed in the fronto in savings for, the company that was the first to land its fire in the fight goes back with di-minished numbers and under command of its second lieutenant. Alas, poor

There was a solemn little group around the campine the night before they go. Frank Armitage, flat on his back, with a rifle bullet through his thigh, but taking things very coolly for all that, is having a quiet conference with his colonel. Such of the wounded of the entire command as are well shough to travel by easy stages to the railway go with Maynard and the regiment in the morning, and Sergeant McLeod, with his saber arm in a sling, is one of these. But the captain of Company B must wait until the surgeons can lift him along in an ambulance and all fear of fever has subsided. The Democratic President and Democratic Congress have been running the Government for 18 months during which time little size has been running. Industry has been practically stopped. I aborthas found little employment and when employed it has been ut greatly reduced wages. Both Government and people wages, Both Government and people have been draining their reserves and both have been running in debt. The Government has suffered in its recence and the people in their incomes. In the total losses to the country in property and wages are beyond human calculation. There has been no reseastion in the waste of weight now have, he contentment, brightness or hope has anywhere appeared. Discontent and distress have been universal. The appeals to charity have never been so numerous and increasant, nor their neces sity everywhere so manifest.

An Interesting History

The history of the new tariff legislation is interesting and instructive. The House, which alone has the power to originate revenue bills, passed what is known as the "Wilson bill, a measure which has the unenviable distinction of being the only tariff bill in our history that was ever indersed by a President in his annual measure or Congress before it.

that was ever indorsed by a President in big annual message to Congress before it had been reported to the House, and be fore it bind even been officially adopted by the Ways and Means Committee. It was estensibly a tariff bill for revenue and yet, on its face, it did not raise suffi-cient revenue to conduct the government. If that bill had become a law, every es-timate I have seen touching its revenue raising power created an annual de-ficiency from \$40,000 to \$60 000,000 Four Hundred Amendments Four Hundred Amendments

the bill went to the Senate and took
the usual course of reference to the Committee on Finance, which is charged
with the revenue legislation of the Senate After protracted consideration by
the committee, the Wilson bill, with
more than four hundred amendments
was reported to the Senate. But, after
misch talking and wangillog, it was soon
made manifest that neither the Wilson
bill nor the Wilson bill with the Finance
Committee's amendments could pass that

And so, taking the matter out of the hands of the Senate, and out of the hands of the Finance Committee of the Senate, a self constituted Adjusting Committee, a committee unknown to the Constitution, a committee unauthorized by the rules of the Senate, or by party cucues, tradition or custom, an Adjusting Committee consisting of Messre. Jones, of Arkaneas, Vest of Missouri and Hurris of Tennessee undertook to make a bill which would receive the votes of forty-three Senators, or a bare majority of all. Suppose President Cleveland and Sentors Gorman and Brice had issued affeldes to the country amouncing that they had so far modified the Domocratic platform as to provide for taxed sugar, what do you think would have been the effect? Does anyhody believe that if this agreement had been thoroughly understood that Mr. Cleveland would have carried the cointry? No Democatic orator, or editor, certainly in the North, ever, so much as hinted that the boon of free sugar was to be taken from the worth of imports from taxation and removed that great duty from the shoul dere of the people
"In looking at a question of this sort you must take late consideration the goods that you exempt entirely from tax ation and add to the free list. That was the peculiar value of the bill of 1887.
